Help Shape Future Apprenticeship Assessments

Apprenticeship assessment is changing. We're seeking input from employers and providers to help define what future assessments should look like, including what must be retained, what should change, and how assessment can best reflect real workplace practice.

Apprenticeship Units – Solar PV installation and maintenance

Apprenticeship Units are the latest Government initiative to enable apprenticeship funding to be used to meet other skills demands. We are working with training providers to develop the skills test for the recently announced apprenticeship unit in Solar PV Installation and Maintenance.

Building Services Engineering Apprenticeships in Development

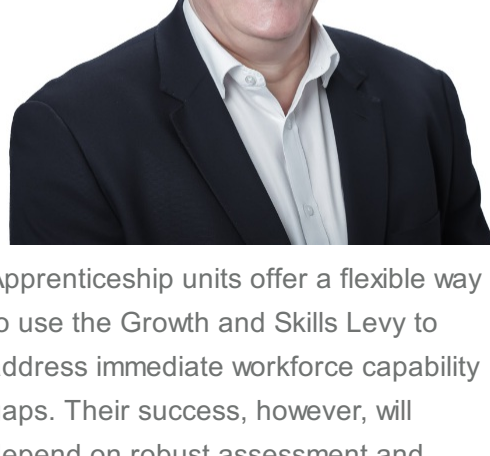

We will soon be adding the following standards to our end-point assessment portfolio:

- L2 Building Services Engineering Installer (ST0065; funding band £12000)
- L3 Building Services Engineering Craftsperson (ST0062), funding band £17000)
- L3 Building Services Engineering Service and Maintenance Engineer (ST0061, funding band £18000)

Apprenticeship Units: Upskilling England's Workforce

Apprenticeship units offer a flexible way to use the Growth and Skills Levy to address immediate workforce capability gaps. Their success, however, will depend on robust assessment and quality assurance. Read our thought leadership article by David Morgan, Head of Business Development, Sales and Marketing, to learn more.
